

Ovente Cool Breeze Tower Fan with Remote Control and LCD Panel (TF88S)

LCD PANEL

Key Features

- **ENERGY-SAVING** – Powered by 100-Watts, it cools down its surface area without using much electricity. It collects air from the ground where it is at its coolest, and releases fresher and cooler air.
- **90° OSCILLATION** – The Ovente TF88S Tower Fan oscillates 90 degrees between 3 different speed settings for optimal air circulation, leaving your room feeling cooler much quicker than its rivals.
- **CONVENIENT** – Includes a remote control and an 8-hour timer that can be programmed in 1-hour intervals. So if you don't want to get up from the couch to turn off your fan, you can do it by using the remote or setting the timer.
- **ATTRACTIVE** – Features a classy, stylish, and trendy design with an impressive-looking LCD panel that complements any room; its silver and black colors match all kinds of home décor.
- **LOW-NOISE TECHNOLOGY** – It makes less noise than its competitors, which in turn fosters better sleep, relaxation, and comfort. Plus, you won't ever hear it while you're watching your favorite tv shows, and its noise won't ever feel intrusive.
