

Ovente Electric Griddle 1200W, Large Non-Stick Plate, Temperature Control Probe and Control Knob, Copper (GD1610CO)

Key Features

FAST HEATING - The Ovente 1200W electric griddle is equipped with a heating element that heats up in seconds, and it evenly cooks a range of food—from bacon, pancakes, and sausages to pork chops and inch-thick steaks—in a matter of minutes!

EFFICIENT - Cook all your meal favorites for you and the whole family and have them ready just in time for breakfast! Its large 16×10 cooking plate makes a huge room for cooking more food at a time.

ALL AROUND - This griddle features a temperature control probe with a control knob that gives you more control in cooking, whether it's cooking quarter pounders or frying bacon strips. Simply adjust the griddle's temperature that's appropriate for your food.

ANTI-GREASE - Enjoy meals without the guilt with its premium non-stick plate that allows you to cook even without oil. It also has a grease channel drains the grease away from your food while it is being cooked on the plate.

EASY TO CLEAN - Cleaning this versatile kitchen aid is just a breeze. The griddle and drip tray are dishwasher-safe, and you can simply wash them with warm, soapy water. The non-stick plate can be cleaned with a non-metal cleaning pad.
