Ovente Electric Infrared Burner, 7” Single-Plate, 1000W, Ceramic Glass & Stainless Steel, Black (BGI101B)

Key Features

HASSLE-FREE COOKING EXPERIENCE – The cooktop is powered by 120V (1000W). It uses infrared technology, an advanced system for smooth-top electric ranges, heating up food quickly and evenly without any hot or cold spots.
COMPATIBLE TO ALL COOKWARES – Unlike induction cooktops, this countertop burner works well with all types of cookware. However, for best results, use flat cookware as close to the plate size of the burner (7" in diameter) as possible. The pot can handle the maximum weight of 3 kg (6.6 lbs).
CLASSY AND PORTABLE – Its flat stainless steel housing and sleek crystallite ceramic glass top make this burner look great on any countertop. Plus, it is slim and light (3 lbs), making it perfect for small studios, kitchenettes, RVs, and camping trips.
EASY TO CLEAN – Cleaning the crystallite glass and the metal housing is fast and simple—it won't even take you more than a minute. Simply wipe the cooktop with a clean, damp cloth, and it would look fresh again.
1-YEAR WARRANTY – At Ovente, we aim to make your life easier by producing top-quality housewares, designed with you in mind. We have pledged to uphold all our offerings to the highest standards, and we back all our products with one (1) year warranty from the date of purchase from an authorized retailer. This warranty covers defects in workmanship and materials.
