

# Ovente Portable Charcoal Grill with Dual-Venting System (GQR0400BR)

## Key Features

- 13.4" COOKING SPACE** – This portable charcoal grill has a 13.4-inch capacity, which is large enough to use when cooking food for up to 4 people. Having this outdoor grill in your backyard is perfect for small gatherings with your family or closest friends.
- CHROME-PLATED GRILL** – The chrome-plated exterior of this charcoal grill provides bright, high-gloss, mirror-like metallic surface, and can also resist corrosion, rust, and abrasive wear.
- ENAMEL-COATED FIREBOX** – The firebox or interior of this charcoal grill is coated with enamel, which protects surfaces from chemical and physical damage. The enamel-coated firebox is made to withstand high temperatures during grilling.
- DUAL-VENTING SYSTEM** – The dual-venting system is perfect for low and slow cooking because it manages the grilling temperature each time you cook. The Ovente Portable Charcoal Grill uses both lower and upper vents – oxygen enters the lower vent to fuel the charcoal, while the upper vent lets the heat and smoke exit the grill.
- CONVENIENT** – Comes with a cool-touch handle that provides extra care when handling the grill top, and an ashtray that catches ashes for a hassle-free cleaning.
