

# Ovente Ultrasonic Cool Mist Humidifier, 2.5 Liter, Refillable Water Tank, Moisture Control Knob, Cool Mist Outlet, Indicator Light, 20-Watts, Blue (HMD625BL)

## Key Features

- BENEFICIAL** – Ultrasonic humidifiers relieve dry skin, chapped lips, allergies, asthma symptoms, and flu by releasing moisture into the air. This gives you softer, more vibrant skin; loosens constricted airways; relieves congestion, nosebleeds and sore throats; and alleviates snoring. They also help your baby sleep better. A lesser-known fact is that they help preserve your real wood furniture.
- 2.5L REFILLABLE TANK** – This ultrasonic humidifier has a large 2.5-liter refillable tank that provides sufficient moisture for large rooms. To refill the tank, turn the knob to “min” or “off”, unplug from the outlet, detach the parts, and then add water to the tank.
- ADJUSTABLE MOISTURE** – With its moisture control knob, you can easily set and adjust the moisture output of this portable humidifier. Simply turn the control knob from “min” to the desired moisture level. After one or two minutes, mist will come out from the cool mist outlet.
- EFFICIENT** – It comes with a 20-watt motor that operates for hours without costing you extra money on your electric bill. In addition, it has an easy-to-see indicator light that indicates when it is working.
- EASY TO CLEAN** – Make sure your humidifier is turned off and unplugged from the power outlet; remove the tank from the base and pour the remaining water out of the tank. Then apply cleaning solution into the tank, brush with a soft brush, rinse with water, and wipe the base and tank with a soft, dry cloth. Clean your humidifier often to avoid exposure to bacteria and mold.
